

Abu Saleh Muhammad Naeem

Software Engineer (Backend)

+880 1766 202 327 | asaleh.naeem@gmail.com | linkedin.com/in/asalehmn | github.com/ASNaeem | Dhaka, Bangladesh

Summary

Computer Science and Engineering graduate with professional experience developing backend systems using Go (Golang), Java, PostgreSQL, Redis, RabbitMQ, and Docker. Experienced in designing RESTful APIs, developing microservices using the Ports and Adapters (Hexagonal) architecture, implementing secure JWT-based authentication/authorization, and building scalable multi-tenant applications. Research experience in machine learning and privacy-preserving AI complements practical backend software engineering expertise.

Education

University of Liberal Arts Bangladesh <i>Bachelor of Science in Computer Science and Engineering (CGPA: 3.59)</i>	Dhaka, Bangladesh <i>2022 – April 2026</i>
---	--

Experience

OonkoO <i>Junior Backend Developer</i> – Refactored legacy Java (Spring Boot) backend applications and migrated core services to Go (Gin) microservices as part of a platform modernization effort. – Designed and developed Go microservices following Ports and Adapters (Hexagonal) architecture, implementing RESTful APIs, business logic, and PostgreSQL data access layers. – Implemented database-level multi-tenancy across microservices, enabling secure tenant isolation while maintaining a scalable and extensible architecture. – Integrated Redis for caching and RabbitMQ for asynchronous messaging, improving cross-service communication responsiveness. – Developed JWT-based authentication and authorization for the ControlBits habit tracking application to secure REST APIs. – Validated REST APIs through functional/integration testing, verified data integrity, and resolved backend issues. – Containerized services with Docker and collaborated using Git/GitHub workflows, code reviews, and Agile methodologies. – Collaborated with frontend developers (React, Next.js) by integrating backend APIs and supporting end-to-end feature delivery.	Dhaka, Bangladesh <i>April 2025 – July 2026</i>
---	---

Technical Skills

Languages: Go (Golang), Java, Python, JavaScript, SQL, C, C++
Backend: Gin, Spring Boot, Microservices, REST APIs, JWT Authentication & Authorization, Ports and Adapters (Hexagonal Architecture), Node.js, Express.js
Databases: PostgreSQL, MySQL, MongoDB
Caching & Messaging: Redis, RabbitMQ
Tools & Platforms: Linux, Docker, Git, GitHub, Postman
Frontend (Working Knowledge): React, Next.js, HTML, CSS, Tailwind CSS, Bootstrap
Machine Learning: PyTorch, TensorFlow, scikit-learn, NumPy, pandas
Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Design, Distributed Systems

Research & Publications

- Co-author, **Machine Unlearning in Medical Image Classification** – IEEE BECITHCON 2025 (Accepted and Presented)
- Co-author, **Efficient Data Erasure via Sparsity & Stability Mechanisms** – ICCIT 2025 (Accepted and Presented)
- Author, **Feature-Aware Identity-Wise Machine Unlearning for Face Recognition** – IEEE SPICSCON 2026 (Under Review)

Projects

Simple-VCMS (Veterinary Clinic Management System) | *Python, PyQt5, MySQL*
– Developed desktop application managing patient records, appointment schedules, billing, and MySQL persistence.

Trade-Hub – Online Resale Marketplace | *MERN Stack, Tailwind CSS*
– Built full-stack marketplace featuring authentication, product listings, real-time chat, and CRUD operations.

Portfolio Website | *React, MongoDB, Bootstrap*
– Designed personal website with dynamic guestbook functionality, contact form, and MongoDB database storage.

WebNote | *Node.js, Express, MongoDB*
– Note-taking web application built with Express.js and MongoDB featuring RESTful CRUD APIs and simple responsive interface.

Achievements & Languages

Achievements: 2nd Runner-Up – ULAB Independence Day Programming Contest (Spring 2023) | 4th Runner-Up – ULAB Take Off Programming Contest (Summer 2022) | Honorable Mention – ICPC Dhaka Regional (2018)
Languages: Bengali (Native), English (Professional Working Proficiency)
